# HORTIMOVER TECHNICAL SPECS

## 1 REINFORCED FRONT WHEEL ASSEMBLY

Designed for maximum strength and stability under heavy nursery loads.

## 2 BALANCED WEIGHT DISTRIBUTION

Engineered for improved towing stability and smooth transport.

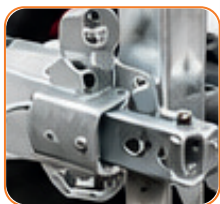

## 3 OPTIMIZED AXLE POSITIONING

Ensures stable handling and consistent performance on nursery terrain.

## 4 WEAR-RESISTANT CONNECTIONS

Reinforced pivot points ensure long-lasting smooth operation.

## 5 PRECISION WHEEL ALIGNMENT

CNC-machined wheel mounting provides accurate alignment for reliable tracking.

## 6 ERGONOMIC OPERATING HANDLE

Comfortable operation with improved leverage and easy access.

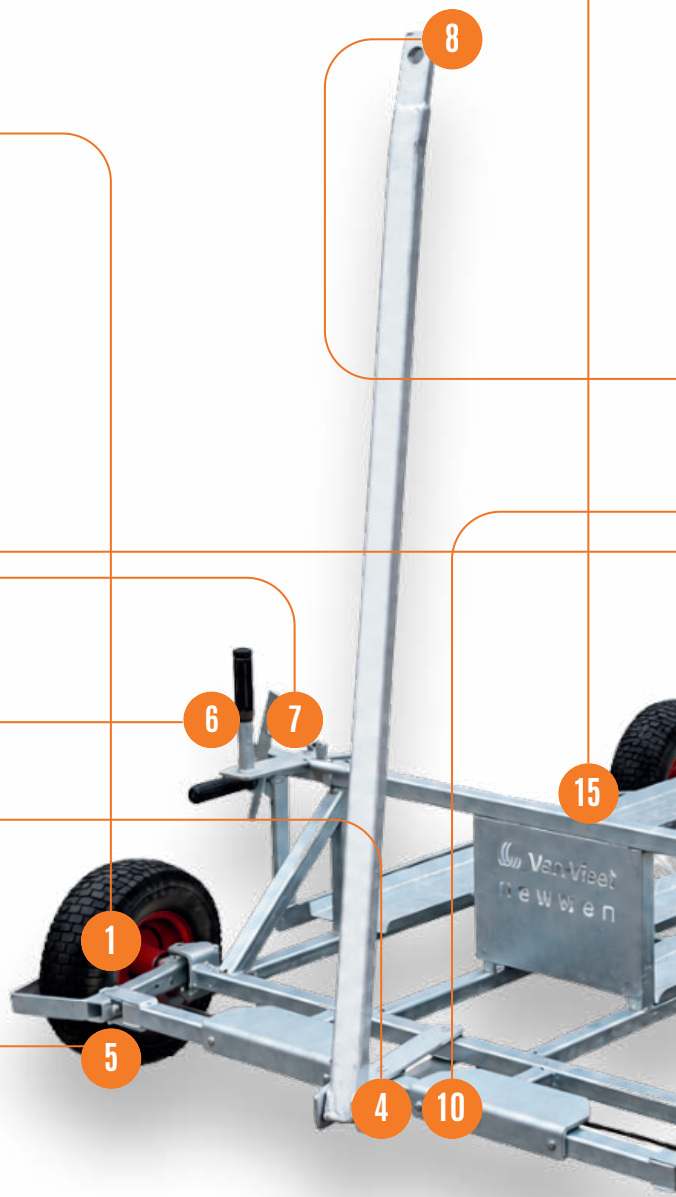

## 7 ONE-HAND LOCKING SYSTEM

Fast and effortless coupling and uncoupling of nursery carts.

## SERVICE-FRIENDLY DESIGN

Pin-connected components allow fast maintenance and easy replacement of wear parts.

## 15 SUITABLE FOR VARIOUS TYPES OF CARTS

Designed for Danish trolleys and a wide variety of other cart types. Custom configurations are available and manufactured to order to meet your specific requirements.

Looking for Danish or custom trolleys? Besides the HortiMover, we also supply a complete range of Danish trolleys, CC containers and custom-built transport trolleys, tailored to your operation. Discover the full range at: [www.vanvlietcontainers.nl](http://www.vanvlietcontainers.nl)

## 8 SELF-ALIGNING COUPLING SYSTEM

Enables multiple HortiMovers to be coupled together for smooth and stable tracking.

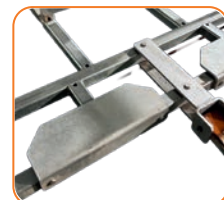

## 9 TUBULAR FRAME REINFORCEMENT

Increased structural rigidity for intensive use.

## 10 OPTIMIZED FRONT PROTECTION

Strong, lightweight construction improves durability without unnecessary weight.

## 11 OPTIONAL MUDGUARDS

Protect plants, equipment and operators against mud and debris.

## 12 PROTECTIVE BUMPER PLATES

Help protect both nursery carts and HortiMover during daily operation.

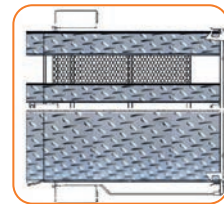

## 13 PROFESSIONAL IDENTIFICATION PLATE

Clearly marked with serial number and product specifications for fleet management and service.

## 14 MULTIPLE PLATFORM CONFIGURATIONS

Available with full deck or rail platform to suit different nursery applications.

## PREMIUM DUTCH ENGINEERING

Designed and manufactured in The Netherlands by Van Vliet Containers – Newwen.

# INTENSIVE DAILY USE

The HortiMover is a heavy-duty trailer, engineered and manufactured in the Netherlands specifically for professional horticultural operations. Rather than introducing a new transport system, the HortiMover is designed to maximize the value of the equipment you already own. It transports your existing Danish trolleys (CC containers), nursery carts, harvest carts, plant racks, or virtually any rolling cart used within your operation.

Its low-profile, flat loading platform allows fully loaded carts to be rolled directly onto the trailer without the need for lifting, unloading, or repacking plants. Once secured, multiple loaded carts can be transported safely behind a tractor, or other suitable towing vehicle.

The Horti Mover has been developed for the demanding conditions found in commercial nurseries, tree farms, greenhouse operations, and outdoor growing facilities. Large pneumatic tires, a robust steel construction, and an optimized chassis provide reliable performance on gravel roads, grass, dirt tracks, muddy surfaces, uneven terrain, and narrow field rows where conventional transport solutions often struggle. By transporting complete cart loads instead of individual plants, containers, or trays, the HortiMover significantly reduces manual handling throughout the production process. Plants remain on the same cart from cultivation and maintenance to transport, storage, shipping, or retail preparation. This minimizes product handling, reduces the risk of crop damage, improves labor efficiency, and creates a more organized logistics process.

Operations that previously required numerous individual transport movements can now be completed with only a few trips. The result is higher productivity, lower labor costs, reduced physical strain for employees and a more efficient use of equipment throughout the growing season. Because every nursery operates differently, the HortiMover is available as a proven standard solution for transporting standard Danish trolleys. For growers using custom-built nursery carts or other non-standard rolling cart systems, the HortiMover can be manufactured to order to match the dimensions and specifications of their existing equipment. This allows growers to improve internal logistics without replacing their current carts or changing established workflows.

The HortiMover is not intended to replace your transport equipment, it is designed to make it perform better. It is a practical, long-term investment that increases the efficiency of your existing logistics system while maintaining the flexibility that modern horticultural businesses require.

## WHY PROFESSIONALS CHOOSE IT

### HEAVY DUTY CONSTRUCTION

Galvanized steel frame built to handle the toughest conditions.

### CORROSION RESISTANT

Galvanized finish for maximum protection and long service life.

### EASY TO USE

Smart design for fast loading, easy handling and transport.

### MAXIMUM EFFICIENCY

Transport more in less time. Increase output, reduce costs.

# GROW TODAY PAY OVER TIME

The HortiMover helps professional growers, nurseries and greenhouse operations move flower and plant carts more efficiently, safely and cost-effectively. By improving internal logistics, reducing labor requirements and increasing productivity, the HortiMover delivers measurable value throughout your operation.

## FLEXIBLE FINANCING FOR PROFESSIONAL GROWERS

To help growers modernize and expand their business, the HortiMover can be acquired through an attractive financing solution supported by the Dutch export credit system.

This enables qualified buyers to invest in high-quality Dutch-built equipment today while spreading the investment over time. Instead of committing significant capital upfront, growers can preserve cash flow and working capital for crop production, facility expansion, labor and future growth initiatives.

### WHY DUTCH TECHNOLOGY?

For decades, Dutch growers have been at the forefront of agricultural innovation. Limited space, high labor costs and a constant drive for efficiency have driven the development of some of the world's most advanced growing and logistics solutions. The HortiMover reflects this mindset: practical innovation that delivers measurable results. Built for demanding nursery and greenhouse environments, it helps growers transport flower and plant carts more efficiently, reduce labor dependency and improve operational productivity.

### GOVERNMENT-BACKED EQUIPMENT FINANCING

The financing solution is supported by Atradius Dutch State Business (ADSB), the official Export Credit Agency of the Netherlands, acting on behalf of the Dutch Government. Through this support, buyers may benefit from competitive financing structures, longer repayment periods and financing of up to 85% of the purchase value. This allows growers to realize the operational benefits of the HortiMover immediately while aligning the investment with the value it generates over time.

### Invest Today. Grow Tomorrow.

By combining proven Dutch engineering with flexible financing options, growers can modernize their operations today while maintaining financial flexibility for tomorrow.

### Interested in Financing?

Our team will guide you through the process and work together with financing partners and Atradius Dutch State Business to help determine the most suitable financing structure for your investment. Contact us to learn more about the HortiMover and available financing solutions.

## FINANCING HIGHLIGHTS

- ✓ Up to 85% financing available
- ✓ Minimum 15% down payment
- ✓ Typical financing terms of 3–5 years
- ✓ Predictable repayment schedules
- ✓ Preserve working capital and cash flow
- ✓ Government-backed financing support

#### Important Financing Information

Financing is subject to buyer qualification, credit approval and program eligibility requirements. Financing terms, repayment schedules and availability may vary based on transaction size, buyer profile and country-specific requirements. Financing support may be provided through approved financing partners and supported by Atradius Dutch State Business acting on behalf of the Dutch Government.

# ABOUT US

At Van Vliet-Newwen, we help growers, nurseries and horticultural businesses improve their internal logistics with practical, durable and innovative transport solutions. We understand that every operation is different and that efficient material handling is essential for productivity, labor efficiency and long-term business success.

With more than **25 years of experience** in horticultural logistics, we support customers around the world with high-quality transport systems designed to perform in demanding nursery environments. From standard Danish trolley solutions to **manufactured-to-order equipment** such as the HortiMover, we combine proven engineering with practical field experience.

Quality, reliability and long service life are at the heart of everything we build. Our products are designed to withstand intensive daily use while helping growers move more with fewer trips, lower labor costs and less physical strain. By extending product life and improving transport efficiency, we also help reduce unnecessary transport trips, material consumption and operating costs.

As your logistics partner, we look beyond today's challenges. We develop practical solutions that help growers work more efficiently today while preparing their operations for the future.

**Ready to improve your nursery logistics?**  
**Contact our team to discover how the HortiMover can increase efficiency within your operation.**

## WHY VAN VLIET - NEWWEN

### DUTCH ENGINEERING

Smart design and high-quality Dutch craftsmanship.

### BUILT FOR INTENSIVE USE

Strong, reliable and made to perform every day.

### CUSTOM-BUILT SOLUTIONS

Tailored to your operation and specific needs.

### INTERNATIONAL DISTRIBUTION

Trusted by customers across multiple countries.

### RELIABLE SERVICE & SUPPORT

We are there when you need us.

### FOCUS ON LONG-TERM PERFORMANCE

Built to deliver value for many years.
